

# PROJECT SHOWCASING

## TEAM SPECIFICATION:

- A team can have maximum of 3 members.
- A team can not showcase more than one project.

## ABOUT PROJECT:

- Participants are allowed to design and build any hardware or software-based product or prototype.
- A primary screening will be done based on the submitted abstract.
- A limited number of teams will be allowed to showcase their project in the final round.

The project should be innovative. Type of project may include (but not limited to):

- Robotics
- Embedded system
- Biomedical Automation
- Artificial intelligence
- IOT
- Network security, etc.
- Architecture
- Pure Science Demonstration

## ABOUT PROJECT SHOWCASING:

- At least one member from each group must be present with the project, always and during presentation all the members must be present before judges.
- There will be a preliminary screening of the topics so that there is no collision of ideas
- Showcasing and judging - both will be held on the same day.
- Project must be presented by the registered groups.
- Each group should bring their own electrical equipment (e.g. multiplug, laptop, etc)
- In all cases, decision taken by the authority will be final.
